You're in great hands.

Constructing a venue space and/or greenhouse is quite an undertaking. These buildings serve as wedding and event venues so need to be amazing. Have confidence, as our years of service and experience combine to create great end results and happy customers. We pride ourselves on not only being the best, but also on delivering the best service. We are real people who will walk with you through every step of your project.

We are Conservatory Craftsmen, artisans who craft the space of your dreams.

Getting Started

You're ready to get things started. Where should you begin? Let's create the perfect event space where weather won't be an issue. This nearly outdoor garden can host nearly any special event.

These types of spaces are in high demand and are used for special events from weddings to corporate functions. All of which will be served well and booked for months in advance because weather will never be a factor and the view will always be spectacular.

Budgets vary and so do needs. We have a variety of structural designs to span the options. Stay within standard designs and you will economize your investment. If you want a more elaborate design then feel free to employ our team of talented designers to create a one-of-a-kind masterpiece.

We begin with the building. We offer two roof designs: traditional and botanical. The traditional roof design is a straight roof frame, of a more 'traditional' look and is adaptable to many related architectural buildings. If your venue space is going to be attached to other buildings, this is the more seamless way to go. The botanical style has a curved, natural look to the roof line and an elegant style unmatched architecturally.

Traditional

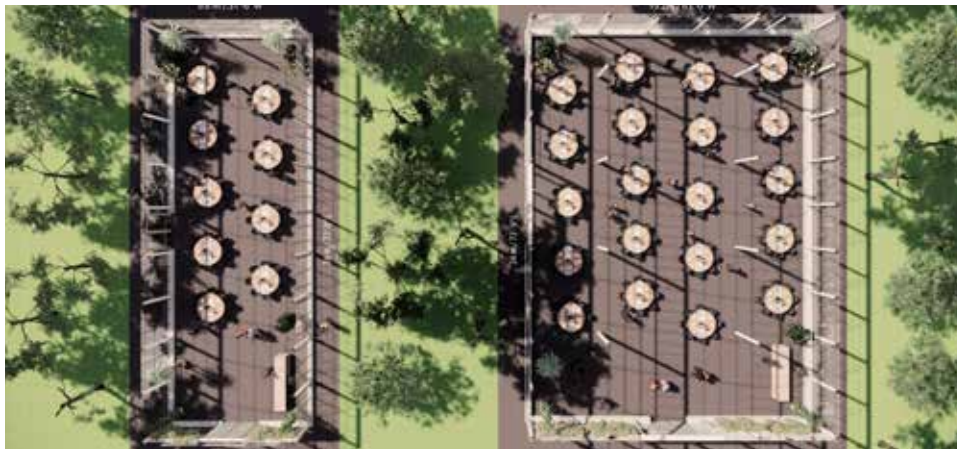

- STYLE -

The Traditional Style has a straight roof.

- Option A:** 16' wide, built to any length, walls are 10'6"
- Option B:** 31'6" wide, built to any length, walls are 10'6"
- Option C:** 63' wide, built to any length, walls are 10'6"

Standard with every structure:

- Insulated Glass, high efficiency LowE glass.
- Tempered on all, laminated on roof
- Custom color powdercoated frame
- Installation by trained USA install crews
- Walls to ground
- Starting at \$350/square foot installed

Botanical

- STYLE -

The Botanical Style has a curved roof.

Option A: 16' wide, 10'6" straight side walls

Option B: 31'6" wide, 10'6" straight side walls

Option C: 63' wide, built to any length, walls are 10'6"

Standard with every structure:

- Insulated Glass, high efficiency LowE glass.
Tempered on all, laminated on roof
- Custom color powdercoated frame
- Installation by trained USA install crews
- Walls to ground
- Starting at \$350/square foot installed

Custom

- BUILD -

Imagine all the possibilities with a custom build. This route is totally tailored to your needs and space. Every part of the building process is much more detailed and customizable. These structures are great for a variety of uses.

Standard with every structure:

- Insulated Glass, high efficiency LowE glass.
- Tempered on all, laminated on roof
- Custom color powdercoated frame
- Installation by trained USA install crews

The Comfort of your Guests Comes First

When you have an event venue or a greenhouse built, have us take the additional stress and work out of these places by building these spaces loaded with industry-leading smart tech.

Windows

They provide ventilation and can automatically close if they sense it's raining, as well as open or close to maintain the correct temperature.

Roof Shading

Shades and blinds control how much sun you get, and ensure privacy when it's needed, with our motorized window coverings.

Lighting

A range of settings ensure you can create the perfect ambience with your lighting.

We deliver a venue so smart, it does the thinking for you.

Consistently comfortable using smart tech that automates everything in your space.

Temperature Control

Options like in-ground heating or solar heat sink heating/cooling are available to keep your space the perfect temperature.

Remote Access

Every automated feature can be controlled from a single phone or tablet, so you can easily respond to any adjustments that need to be made, from any location.

Security

Cameras and locks are integrated into your system so you can monitor any activity and make sure everything is secure.

From top to bottom, we put excellence in every finishing touch.

Featured Project

- THE STANDARD ON STATE -

This 4 story, 100 year old, vacant furniture store on the banks of the Rock river in Rockford, IL was begging for a new life. A group of Rockford businessmen saw the possibilities and our custom build team went to work.

Event space is at a premium in Chicago, and what is available is at exorbitant prices to couples. Why not build a wedding center with a spacious rooftop conservatory, a view of the city and a guaranteed location for an outdoor wedding, no matter what weather. The team that made up The Standard had goals for a destination wedding venue. The construction of this project was to coincide with the building renaissance taking place on the Rockford, IL riverfront. Conservatory Craftsmen was brought on for a the crowing jewel of the three story masterpiece- the roof top conservatory.

The owners were intent on building the finest roof top conservatory in the Chicago area. They knew they wanted something that would draw a wedding party out of the Windy city into a nearby venue with more to offer. Their dream was to have a roof top conservatory in which a couple could be married, and also assured that no matter what the weather, the wedding could be 'outdoors'. Mission accomplished.

Endless Possibilities

So many inspiring spaces. Now just imagine what we can do for your project. Then let's create. Together we can build a luxury conservatory that fits your needs and all you can envision. We will spend an inordinate amount of time on the front end of your project. That means we design, engineer and re-design (if necessary) to assure that when on-site our time is spent as efficiently as possible. We are professional conservatory builders who take pride in our workmanship and quality.

Greenhouses

With Conservatory Craftsmen you'll get a structure that meets your standards of comfort, convenience, and accessibility. We work together to create and build greenhouses up to 5 acres. Large scale greenhouses come in two widths: 31'6" and 63'. Custom sizes are available by request but will involve additional costs.

What makes our greenhouses different? We can provide any design any custom size and dimension. We employ fully insulated glass and insulated aluminum extrusion. We can custom powdercoated any color. Our greenhouses employ automation to keep the room temperature under control, windows on walls and roof to open/close automatically. Fans and ventilation automatic. Heating, watering all automatic. Our greenhouses are constructed by American teams that are skilled and experienced. All structures come with a 10 year warranty, served by an American company.

Greenhouse Options:

- Part of your home
- Garden Centers
- Production Greenhouses
- Deep Winter Greenhouses

All Standard:

- Insulated energy glass
- Thermally broken aluminum frames
- Powdercoated custom colors

Options Include:

- Electric windows and roof vents
- Full worry-free automation
- Roof blinds
- Insect screens
- Installation by trained American crews
- Maintenance and warranty
- Hydroponic and aeroponic growing systems
